Outdoor Storage - \$600/year

RV Storage Agreement

The Alberta Conference property insurance does not cover damages or loss of a private RV located on the premises and is therefore not liable for any claim. The administration will not be held responsible for any damages or loss caused by any action or peril, human or otherwise, to an RV while located on Alberta conference property, inside or outside a building. RVs and all personal possessions left at Foothills Camp are stored at owner's risk.

RV Owner's Responsibility to Foothills Camp (Initial each # to indicate item is done)

1. The registered owner(s) must carry RV insurance. Please ensure you are covered for storing items and staying in the RV.
2. Propane cylinders must be shut off before entering storage. All other fuel containers must be closed, not leaking, and made secure or removed for the storage period.
3. Storage batteries must be disconnected at the battery terminal (positive lead) on trailers and campers. In motorized RV's, the battery to the engine must be disconnected at the positive battery terminal as well as the auxiliary batteries for the RV. These precautions are necessary to avoid a short-circuit causing a spark and igniting vapors or a fire.
4. No electrical hook-ups are allowed during the storage period. No major repairs, spray painting or welding of any kind are allowed while in storage, except when taken to the repair shop. Permission for such repairs must be approved and coordinated by and with camp management.
5. It is the responsibility of the RV owner to move and park their RV at the designated winter storage location approved and coordinated by camp management.

Please Note: Storage on the campground may be subject to cancellation on 30 days' notice at any time. It is subject to legal requirements with municipal - standards, bylaws and customs regulations.

I have read the Storage Agreement and request that my RV be stored at Foothills Camp from...
